✓ **Comments and extended discussion**

Our team hasn't been able to accomplish much because it would be beneficial to meet with our advisor/client first to get more details on the project. It would also be beneficial to meet with the ABE capstone group assigned to the other part of this project. We could also try contacting Jace Klein (jaklein@iastate.edu), a senior that interned at Agri Drain and is able to explain the control parameters needed to effectively manage the water levels in Drainage and Irrigation modes.

We need a server assigned to us to put information on the group webpage.

✓ **Plan for coming week (please describe as what, who, when)**

  ❖ A. Set up a meeting with our advisor – Anne ASAP
  ❖ B. Get a project plan complete – Adam and Michael once we have met with advisor/client
  ❖ C. Finish setting up a webpage for our project – Griffen once we get our server assigned

✓ **Summary of weekly advisor meeting (if applicable/optional)**

Our team has not had an advisor meeting at this point.
