✓ Weekly Summary (Short summary about what you did this week)

Our team discussed more about how each of our development environments will be set up and how it pertains to our roles. We also decided how we will do version control (including discussion on branching, tagging, blaming, logging, etc.). We have been attempting to set up another meeting with our client (we've only had one). We are also attempting to set up a meeting with the ABE group which is responsible for the other half of this project. We believe that, before major development starts, we need to have a clear understanding of how the two halves of the project are going to be able to come together. Our team also created slides to present to the class a description of our project.
